ushabti (u:'ʃæbti). *Egyptology.* Also ushebte, ushebti. Pl. ushabtis, -iu. [a. Egyptian *wšbty* answerer.] A figurine of a deceased person, made of faience, stone, wood, etc., and placed in an ancient Egyptian tomb to act as a substitute for the dead person in any work he might be called upon to do in the afterlife. Also ***ushabti-figure***. See also SHABTI, SHAWABTI.

1902 *Geogr. Jrnl.* XX. 429 Dr. Cvijič's researches have led him to consider the uvala (Karstmulde) as an intermediate form between doline and polye. The uvala is a large, broad sinking in the karst with uneven floor, formed by the breaking down of the wall between a series of dolines. **1921** *Geogr. V

V (vi:), the 22nd letter of the modern English and the 20th of the ancient Roman alphabet, was in the latter an adoption of the early Greek vowel-symbol **Ϝ**, now also represented by U and Y (q.v.), but in Latin was employed also with the value of the Greek digamma (viz. *w*), to which it corresponds etymologically. When not purely vocalic, it still denoted this sound at the time when the earliest Latin loan-words were adopted in the Teutonic languages; consequently such words beginning with *v* appear in Old English with *w*. Under the Empire, however, the semi-vocalic sound gradually changed to a bilabial consonant, and finally became the labio-dental voiced spirant now denoted by the letter in English and various other languages. This development did not take place in Old English; and no *v*, whether bilabial or labio-dental, occurred initially in the older Teutonic languages, although the sound was common in other positions (in OE. denoted by *f*, in early texts by *b*).

In OE. dictionaries there is thus no set of words with initial V, one or two Latin words adopted at a late period usually appearing with *f*, as *fann*, *fers* (but also *vers*), from L. *vannus*, *versus*. The first appearance of V-words is found in those ME. texts which begin to show a distinct French influence, as the *Ancren Riwle*; even early writers like Orm and La3amon, while not free from the use of French words, do not employ any beginning with *v*. The number of such words steadily increases in later texts, and is subsequently greatly reinforced by direct adoptions from Latin, by new formations on Latin stems, and by adoptions from other Romanic languages. The other sources of initial V are of minor importance. The change of *w* to *v*, which took place in the middle period of the Scandinavian languages, is represented in a few words, as *Valhalla*, *valkyrie*, *viking*, but otherwise the words with this initial are chiefly derived from languages not directly related to English. A small number of words, however, as *vat*, *vixen*, exemplify the voicing of *f*- peculiar to southern (now only south-western) dialects. This change is not indicated in OE. spelling, and how far it had developed in speech is uncertain, but in southern ME. texts all native words (rarely those of French or Latin origin) beginning with *f* may appear with *v*- (or its equivalent *u*-); the more important variant forms due to this cause are entered in their places below. Conversely words properly having *v*- are occasionally written with *f*-, and there is evidence that this is not merely graphic, but represents an actual pronunciation. ('Euen so oure Englishmen vse to speake in Essexe, for they say fineger for vineger, feale for veale, & contrary wyse a voxe for a foxe, voure for foure, etc.' 1546 Langley, tr. *Pol. Verg. de Invent.* I. vi. 14.)

When not initial, *v* occurs freely in native words as well as in those of Latin or other origin. In the former it represents OE. *f* when voiced, as in *æfen* even, *drifan* drive, *lufu* love. The use of *f* (or *ff*) in such words was partly retained in ME. (and especially in Sc. down to the 16th century); but even in late OE. *u* is frequently substituted, and in early ME. (as in med.L. and OF.) *u* and *v* come into general use to denote the sound in all positions. It was only in the 17th century that these two letters, both of which had been employed in a double function (see U), were finally distinguished as vowel and consonant; and down to the 19th century words beginning with either letter continued to form one series in dictionaries.

In some ME. (chiefly northern) manuscripts, and in many Scottish texts of the 15th and 16th centuries, *v* is more or less frequently written in place of *w*, while conversely *w* is freely written instead of *v*. These forms are merely graphic, and do not imply a phonetic interchange of *w* and *v* (though in mod. north-eastern Sc. *wr*- has become *vr*-). In south-eastern English dialects the change of *v*- to *w*- does occur, and older representations of Cockney speech exhibit a converse change of *w*- to *v*-, which recent investigators have been unable to verify as still existent. The latter change is illustrated in the following quotations.

1803 PEGGE *Anecd. Eng. Lang.* (1814) 77 Villiam, I vants my vig... Vitch vig, Sir?.. Vy, the vite vig in the vooden vig-box, vitch I vore last Vensday at the westry. **1824** *Spirit Publ. Elision of *v* when not initial has taken place extensively in dialects, especially those of the North and Scotland, as in *deil* devil, *shule* shovel, *hairst* harvest. In standard English this is represented by such words as *hawk*, *head*, *lark*, *lord*, and is specially indicated in a few archaic or poetic forms, as *e'en* even, *e'er* ever, *ne'er* never, *o'er* over.

1950 P. M. S. BLACKETT *Let.* 12 July (MS.), We have been discussing here the question of nomenclature and I would like to ask your views about the following suggestion. This is that we should call the special type of track that you and we have observed v-tracks and the particle or particles which make them v-particles. The advantage of this seems to be that the letter v is reasonably unallocated and that the name has strong mnemonic values as, in fact, the tracks are v shaped. **1951** *Nature* 31 Mar. 503/1 Six charged *V*-tracks are due to the decay of new unstable particles. *Ibid.* 503/2 Two schemes are suggested to explain the photographs: $V^o \rightarrow p^+ + \pi -$..; $V^o \rightarrow \pi^+ + \pi -$. **1952** *Sci. c. *Chess.* (See quot. 1930.)

1930 WHITE & HUME *Valves & Bi-Valves* 7 In chess problem terminology, the designation of a Valve has been given to any move which simultaneously opens one line while it closes another. In a broad sense, Valves include a large domain with many varied combinations of themes. There is a much narrower application of the term: Valve, and that is the particular case where not only is the move made by Black, but both of the lines affected are also Black. 1936 P. W. SERGEANT tr. *Znosko-Borovsky's Art of Chess Combination* II. v. 62 In the interception of lines one closes lines to the adversary at critical points, while here one opens lines to one's own pieces. 2. a. An exhalation of the nature of steam, or an emanation consisting of imperceptible particles, usually due to the effect of heat upon moisture. In mod. scientific use, a fluid that fills a space like a gas but, being below its critical temperature, can be liquefied by pressure alone.

Sometimes, esp. in poetry, loosely applied to smoky matter emitted from burning substances.

It is not, however, a result of the liquefaction of the gas, but the deposition of a vapour (using the terms gas and vapour in their common acceptation) from it, and when taken out of the vessel it remains liquid at common temperatures and pressures. **1823** H. ‖**varna** ('va:nə, 'varna). [Skr. *varṇa*, colour, appearance.] Any one of the four early castes or social classes of Hindu society (see CASTE 2 a); the system or basis of this division.

STUTLEY *Dict. Hinduism* 323 *Varṇa*. The word is generally used to denote colour, but its primary meaning, derived from the root vṛ is 'screen, veil, covering, external appearance', and hence colour is only one of the many aspects of the term.
